

J/Ψ Trigger Formation - the "jpsi topology" bit

- J/Ψ Trigger is based on High Towers within Jet Patches

- Trigger uses West-half of Barrel ONLY.

- Trigger is based on "OR" of all possible opposite pairs

- Plots show Barrel (1.0x1.0) Jet Patches seen edge-on

QUESTIONS:

For 2005 run should we:

- a) add East-half of Barrel?
- b) add Endcap?
- c) Restrict combinations to just back-to-back pairs (shown in black)?
